COUNTRY LANE BERNEDOODLES

Prepare for Your First Vet Visit

A calm, confident start to lifelong care

Use the first appointment to establish a baseline and make a preventive-care plan tailored to your puppy.

Before the appointment

- ■ Book a wellness visit soon after bringing puppy home; follow your breeder's guidance
- ■ Bring breeder records, vaccine/deworming history, and health paperwork
- ■ Bring a fresh stool sample if requested; ask how to collect and store it
- ■ Bring current food details, feeding amount, treats, and medication/supplement list
- ■ Write down questions about growth, nutrition, socialization, grooming, and prevention
- ■ Ask the clinic how to safely carry or wait with a puppy who is not fully vaccinated

What to discuss

- ■ Complete physical exam and weight / growth assessment
- ■ Vaccine schedule based on age, history, health, and local exposure risk
- ■ Fecal testing and an individualized parasite-control plan
- ■ Heartworm, flea, and tick prevention appropriate for age and weight
- ■ Nutrition, body condition, feeding frequency, and treats
- ■ Microchip registration and identification
- ■ Dental care, coat care, nails, ears, and handling practice
- ■ Spay/neuter timing if relevant, and future wellness visits

Questions to bring

Which vaccines or tests are due next, and when? _____

What signs should prompt a same-day call? _____

Which preventives are appropriate for my puppy? _____

How do I reach you after hours? _____

Tip: Confirm the exact product and dose with your veterinary team before starting or changing medications or supplements.
